

# FLESH N INK TATTOOS

## TATTOO AFTERCARE

**Remove** the dressing, **Gently Rinse** your tattoo with cold water and **Pat or Blot Dry** with a clean towel or paper towel when you get home.

Keep your tattoo completely dry for the **NEXT 2 DAYS** to allow the ink to be trapped in the skin. (No exposure to water) NB: Wetting your tattoo between these days will damage it.

**(PAST THESE 2 DAYS)** Every day when bathing..., gently wipe your tattoo and apply a **VERY** small amount or **THIN** layer of **Bepanthen** or **After-Care Cream** to your tattoo twice a day in the mornings and evenings for the next **14 DAYS (2 weeks)**

**Please No Vaseline, Zam-buck, Baby Oil, Tissue Oil, Perfumed & Hand Lotions**

Keep your tattoo from soaking in water until the scabs or flakes (Makhokho) fall off naturally. (Do Not Scratch or peel off your tattoo. **Please!!!**)

### **Dos and Don'ts**

- **DO NOT PEEL SCABS FROM YOUR TATTOO OR SCRATCH THE TATTOO!**
- **Do not get your tattoo exposed to the sun until is completely healed.**
- **Do not apply suntan or sunscreen lotion to your tattoo for 14 days (2 weeks).**
- **Avoid swimming in salt water or swimming pools until your tattoo is healed.**
- **Keep the tattoo area clean, free from touching and other ointments, oils, etc.**
- **Wear loose fit clothing; allowing air flow is good for healing tattoos.**

Please feel free to contact me at any time should you have any questions.

Enjoy your Tattoo, Remember it's only permanent when it's healed completely!
